### 5.3 Overarching Goals, Policies and Objectives

**Caibidil:** Volume 1 - chapters » 5. Sustainable Mobility &  
Transport

**Objective TM 07** to "*Introduce measures to reduce traffic congestion in town centres such as pedestrianisation, pedestrian priority and/or improved pedestrian facilities, in particular increasing the number of safe crossings.*" should also include the implementation of one-way roads and the removal of parking spaces as these methods will be required in some town centres to win back space for the provision of improved pedestrian facilities.
