Draft Kildare County Development Plan 2023 - 2029

---

## Importance of Rewilding

**Caibidil:** Volume 1 - chapters » 12 - Biodiversity & Green  
Infrastructure

**Ábhair:** green  
biodiversity, infrastructure

I welcome the focus on biodiversity and climate issues throughout this draft plan, however there are only two passing mentions of rewilding in the draft.

Rewilding is an important tool in combating biodiversity loss. I would like to see specific areas in all parts of the county designated for rewilding to allow natural regeneration to occur.

Rewilding is a low cost measure with high impact. I hope to see it recognised as an objective in the final plan.

**Eochairfhocail:** Halt biodiversity                      Low  
Rewilding, Biodiversity, loss,                      Regeneration, Maintenance
