Don't build the bypass

Caibidil: Volume 1 - chapters » 6. Infrastructure & Environmental Services

Ábhair: infrastructure

The simple fact that none of us want this by-pass should actually suffice. But, let's go over the reasons that were spelt out ad nauseum over two years ago.

- 1) We do not want the added noise pollution of extra traffic.
- 2) We do not want added pollution (fumes) from extra traffic.
- 3) We do not want the added difficulty in entering/exiting the estate as a result of extra traffic.
- 4) We do not want the added risk to the safety of our estate's children brought on by extra traffic.
- 5) We do not want the increased likelihood of anti-social behaviour that accompanies the existence of a giant wall separating our estate from the blessington road.
- 6) Nobody wants even more concrete. Seriously, are you human? Why would any sane population consent to replace more grass with concrete?
- 6) We do not want further destruction of natural habitats along the proposed by-pass. This includes not only areas inhabited by the bee population but also the rather large oak trees that are often centuries old.

Quite simply, there is not a single way in which people living in this estate and others along the blessington road will benefit from this and you all know it. Yes, you could argue such a by-pass might benefit people living in an new developments that get built in the future. However, you were voted to in by US to represent US, not people who don't even live in Naas and certainly not property developers. This is incredibly arrogant and insulting to the local community. I cannot speak for everyone, but I will never ever vote for any TD that went along with this.

Príomh-thuairim:

It's unnecessary and an affront to the interests of local people.

Príomh-iarratais:

Don't build the bypass

Main reasons:

Because we said so.
