As a resident of Naas I fully support the inclusion of The Gallops Avenue in this plan (Chapter 5 and Table 5.4 - Priority Road and Bridge Projects).

Tuairimí:

The Gallops Avenue

Caibidil: Volume 1 - chapters » 5. Sustainable Mobility & Transport

Ábhair: transport

This road proposal will help to meet the current and future transport and movement needs of the town as a whole, supporting residents, businesses and visitors. This proposal will contribute to the better management of vehicular traffic flow around the town and help move traffic away from the town's centre. This will open up safer spaces for cyclists and pedestrians. This will help future proof Naas as cycling and walking are healthier alternatives to driving and are sustainable transport methods in the face of the challenges of climate change. Overall, this proposed road will enhance the liveability of Naas town by reducing the pollution, noise, and delays caused by heavy vehicles and traffic jams.
