Submission in respect of the M4 Motorway and Excess Noise Pollution due to Road Surface

Tuairimí:

M4 Motorway

Caibidil: Volume 1 - chapters » 6. Infrastructure & Environmental Services

Ábhair: infrastructure, environment

I request that the Council consider the re-surfacing of the M4 Motorway at the junctions between Celbridge and Maynooth, which gives rise to excessive Noise Pollution for surrounding lands, housing and businesses. I request that the Council formally consider this request - including a review against EU Noise Related Laws & Regulations in order to assess any potential non compliance with recommended transport & acceptable noise levels for the public. I believe this falls under both Infrastructure & Environmental assessment and development needs.
