Proposed Traffic Calming Measures

Section 38: Road Traffic Act 1994

**PROPOSED VULNERABLE ROAD USER
IMPROVEMENTS AND JUNCTION TIGHTENING
AT MILLBROOK, RATHANGAN.**

Report on Submissions

Comhairle Contae Chill Dara
Kildare County Council

Ref No.	From	Submission	Response
KCC-C542-1	<div>Submitted on: 21.09.2026 - 15:43</div>	<p>Dear Sir or Madam,</p> <p>The proposed upgrades for vulnerable road users arising from the junction improvements at Millbrook, Rathangan, are strongly welcomed and will deliver significant long-term benefits in terms of safety, accessibility, and overall functionality for all road users at this location.</p> <p>Furthermore, I would welcome the scoping for the provision of footpaths and public lighting, and appropriate pedestrian crossing facilities along the Lock Road (R414). This would constitute a substantial enhancement to the village's infrastructure network. Such measures would facilitate the establishment of a continuous and safe orbital pedestrian route around Rathangan, while also providing a secure and accessible means of travel for students and other pedestrians accessing the secondary school, particularly during peak traffic periods.</p> <p>The delivery of these improvements would promote active travel, enhance connectivity between key community facilities, and contribute positively to both road safety and the overall quality of the public realm within the village.</p> <p>Overall, the proposed works at Millbrook Junction represent a valuable investment in the future development of Rathangan and I look forward to additional infrastructure upgrades that are warranted in certain locations. Yours sincerely</p> <p>Local Resident</p>	<p>Thank you for your submission, it has been noted. Support for the scheme is welcomed.</p> <p>Additional measures along the Lock Road (R414) are not included within the scope of this project, as a Safe Routes to School Scheme for Ardscoil Rath lomgháin is scheduled to be progressed in the near future and will consider improvements along this route.</p>
